

Photography

(Certificate Course: CCP21, Outline)

Course Title: Photography

Course Code: CCP21

Course Duration: 30 hours (20 hrs. Theory + 10 hrs. Practical)

Eligibility: 12th passed

Target group: All background students

Department: Physics

Introduction:

This course is designed to encourage all background students. In this module you will learn more about photography techniques to help you get the sharpness you want in your photo. You will also learn different photography techniques. It covers techniques in Photoshop such as scanning and image editing and removing large objects, as well as using Photoshop filters and selecting an appropriate file format.

Aims and Objectives:

- To develop better understanding of photographic and digital camera.
- To develop special effects on image.
- To develop practical knowledge about scanning and image editing options.

Course Outcome:

- The course will then help you improve your post-production skills by discussing the tools and processes.
- To learn some advanced photographic techniques in order to get the perfect exposure for photographs.
- Every lesson will be laid out in a clear and simple manner with the help of visual aids.
